

With Kyocera's SharePoint Connector 4.0 for Healthcare, processes are further streamlined using preset or custom workflows, facilitating the indexing and routing of documents to designated SharePoint Libraries.

## MAKING THE CONNECTION

The healthcare industry – like any other enterprise – must support timely access to information in order to create a collaborative work environment. In years past, hospitals, physician offices and large medical practices relied on e-mail and fax messaging to share patient-related information – medical records, test results, insurance forms and billing data.

While e-mail and fax remain essential, the face of “communication” in the 21st century has changed, most noticeably in the highly-regulated medical sector. Federal mandates regarding information security, specifically protected health information (PHI), have accelerated these changes. For instance, fax machines can no longer be placed near a reception area where others may see confidential documents and filing cabinets must be under lock and key.

As a result, securing and managing paper-based information, while still enabling seamless access to mission-critical patient records, is an on-going challenge for healthcare professionals. To address that challenge, healthcare providers often deploy Microsoft SharePoint®, a server-based enterprise document management (EDM) solution that enables medical personnel to access and share up-to-date information. Authorized users can browse their secure SharePoint Document Library from any network PC, making it easy to search the repository for patient information, review appointment records/timelines, and share requested files. These capabilities are critical in fast-paced medical environments.

## MANAGING WORKFLOWS FROM START TO FINISH

As one of the world's most popular EDM solutions, Microsoft SharePoint integration with Kyocera multifunctional technology is a logical extension of the powerful Kyocera platform. In fact, Kyocera MFP solutions play a key role in healthcare environments, enabling workers to migrate paper-based information into cost-efficient electronic processes.

With Kyocera's SharePoint Connector 4.0 for Healthcare, processes are further streamlined using preset or custom workflows, facilitating the indexing and routing of documents to designated SharePoint Libraries. Users can access SharePoint Document Libraries directly from the MFP's touch screen control panel, making storage, retrieval, on-demand printing and distribution of documents a breeze. For Windows environments,

your institution can create editable file types such as PDF, Word and Excel using the optional Optical Character Recognition powered by OmniPage® OCR. Its robust capability lets you fully extract content while preserving the format of each element, whether it is text, image or spreadsheet, thus saving you time and increasing productivity.

With Kyocera's SharePoint Connector 4.0 for Healthcare, structured content is immediately available to physicians and medical staff alike, enabling them to easily share information, ideas and expertise. When complex workflows are simplified with SharePoint Connector 4.0, healthcare organizations have a valuable resource to help their staff make more informed, timely decisions.

# HyPAS™

Kyocera's HyPAS (Hybrid Platform for Advanced Solutions) is a powerful and scalable software solution platform. Through direct enhancement of the MFP's core capabilities, to the integration with widely accepted software applications, HyPAS will enhance your specific document imaging needs, resulting in improved information sharing, resource optimization and document workflows.

## BENEFITS OF SHAREPOINT® CONNECTOR 4.0 FOR HEALTHCARE

- Maximize productivity by leveraging existing IT infrastructure and embedded Kyocera MFP technology
- Improve decision-making by providing medical staff with readily accessible, up-to-date patient information
- Increase ROI by moving paper-intensive doctor's offices and hospitals to efficient digital workflows, reducing operating expenses and overhead
- Enhance usability by linking directly with existing SharePoint folder structures
- Ensure greater efficiency and accountability by providing an audit trail for tracking patient records
- Enable Kyocera MFPs to serve as an on-demand printing solution, with indexing and retrieval tools
- Support automatic document indexing using the optional OCR capabilities for streamlined workflow and greater accuracy.
- Offer all medical staff full access to patient information, with support for multiple SharePoint servers.
- Provide a secure, easy-to-deploy platform for rapid integration throughout virtually any medical organization.

### COMPATIBILITY

SharePoint Connector 4.0 for Healthcare is compatible with:

- TASKalfa/CS 7550ci/6550ci/5550ci/4550ci/3550ci/3050ci/2550ci\* Color MFPs
- TASKalfa/CS 8000i/6500i/5500i/4500i/3500i Black and White MFPs
- ECOSYS FS-C2626MFP/C2526MFP\*, ECOSYS FS-3640MFP/3540MFP\*, ECOSYS FS-6530MFP/6525MFP\*

\*Requires Optional CF Card
